ALARM MONITORING

Never miss a moment. Monitor your property 24/7 directly from your smartphone.

Features:

- ▶ Perform security actions such as: Arming, Disarming and Internal Arming from anywhere in the world
- ▶ Monitor activity in each sector of the property
- ▶ Review a complete history of the actions and events during property monitoring
- ▶ Receive notifications with images from one or more cameras if there is a violation
- ▶ Receive push notifications of general monitoring events
- ▶ Residential automation and automated functions such as door control
- ▶ Compatible with smart watch or any mobile device

VIDEO MONITORING AND SURVEILLANCE

Capture it all and receive alerts on unusual activity with UNISEC's 24/7 cloud-based video surveillance software.

Features:

- Arm and disarm via remote control
- Receive push notifications via smartphone
- Open and close electronic doors and gates via smartphone
- Captured images are stored in a gallery to save if needed
- Receive images at the time of the violation
- Integration with IP cameras and DVRs of various brands and models

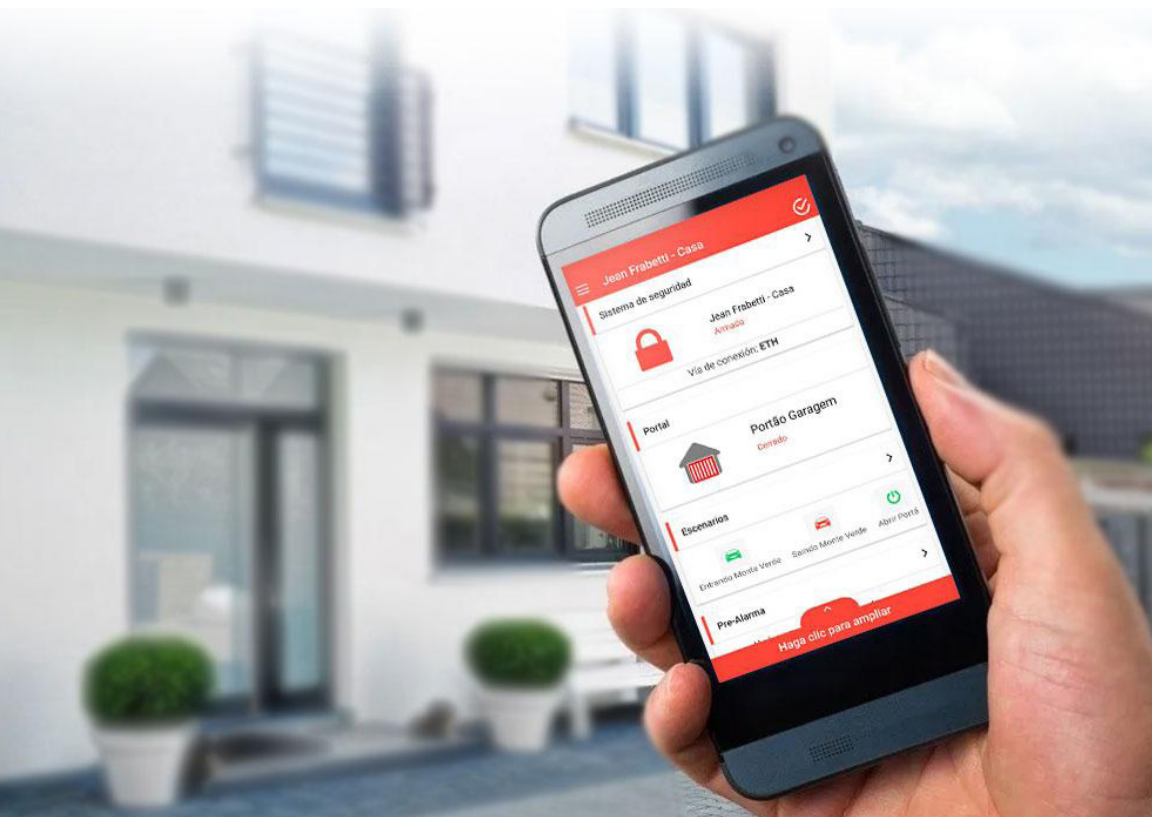

HOME AUTOMATION

Integrate home and building security into your workflow with custom alarm panels and mobile app control. Bring the power of home into your hands.

Features:

- Turn lights on and off via mobile device
- Control doors, gates and automatic windows
- Manage energy usage in the home
- Control electrical and electronic devices

GPS TRACKING

Fulltrack is UNISEC's perfect solution for tracking vehicles, people or objects through mobile devices. With this application, customers can access the track wherever they are, offering convenience, comfort and security. With our GPS tracking software you can protect your fleet, monitor your employees or look after your loved ones anytime, anywhere.
